

RESEARCHERID.COM

QUICK REFERENCE GUIDE

GATEWAY TO RESEARCHERS AND THEIR
PUBLISHED WORKS

IDENTIFY AUTHOR AND PUBLICATION ACCURATELY

ResearcherID (researcherid.com) provides the global, multi-disciplinary scholarly research community with an invaluable index to accurate author identification and information. By assigning a unique identifier to each author who participates, *ResearcherID* expressly associates each researcher with his or her published work – standardizing and clarifying author names and citations and making information search more straightforward and relevant.

THOMSON REUTERS

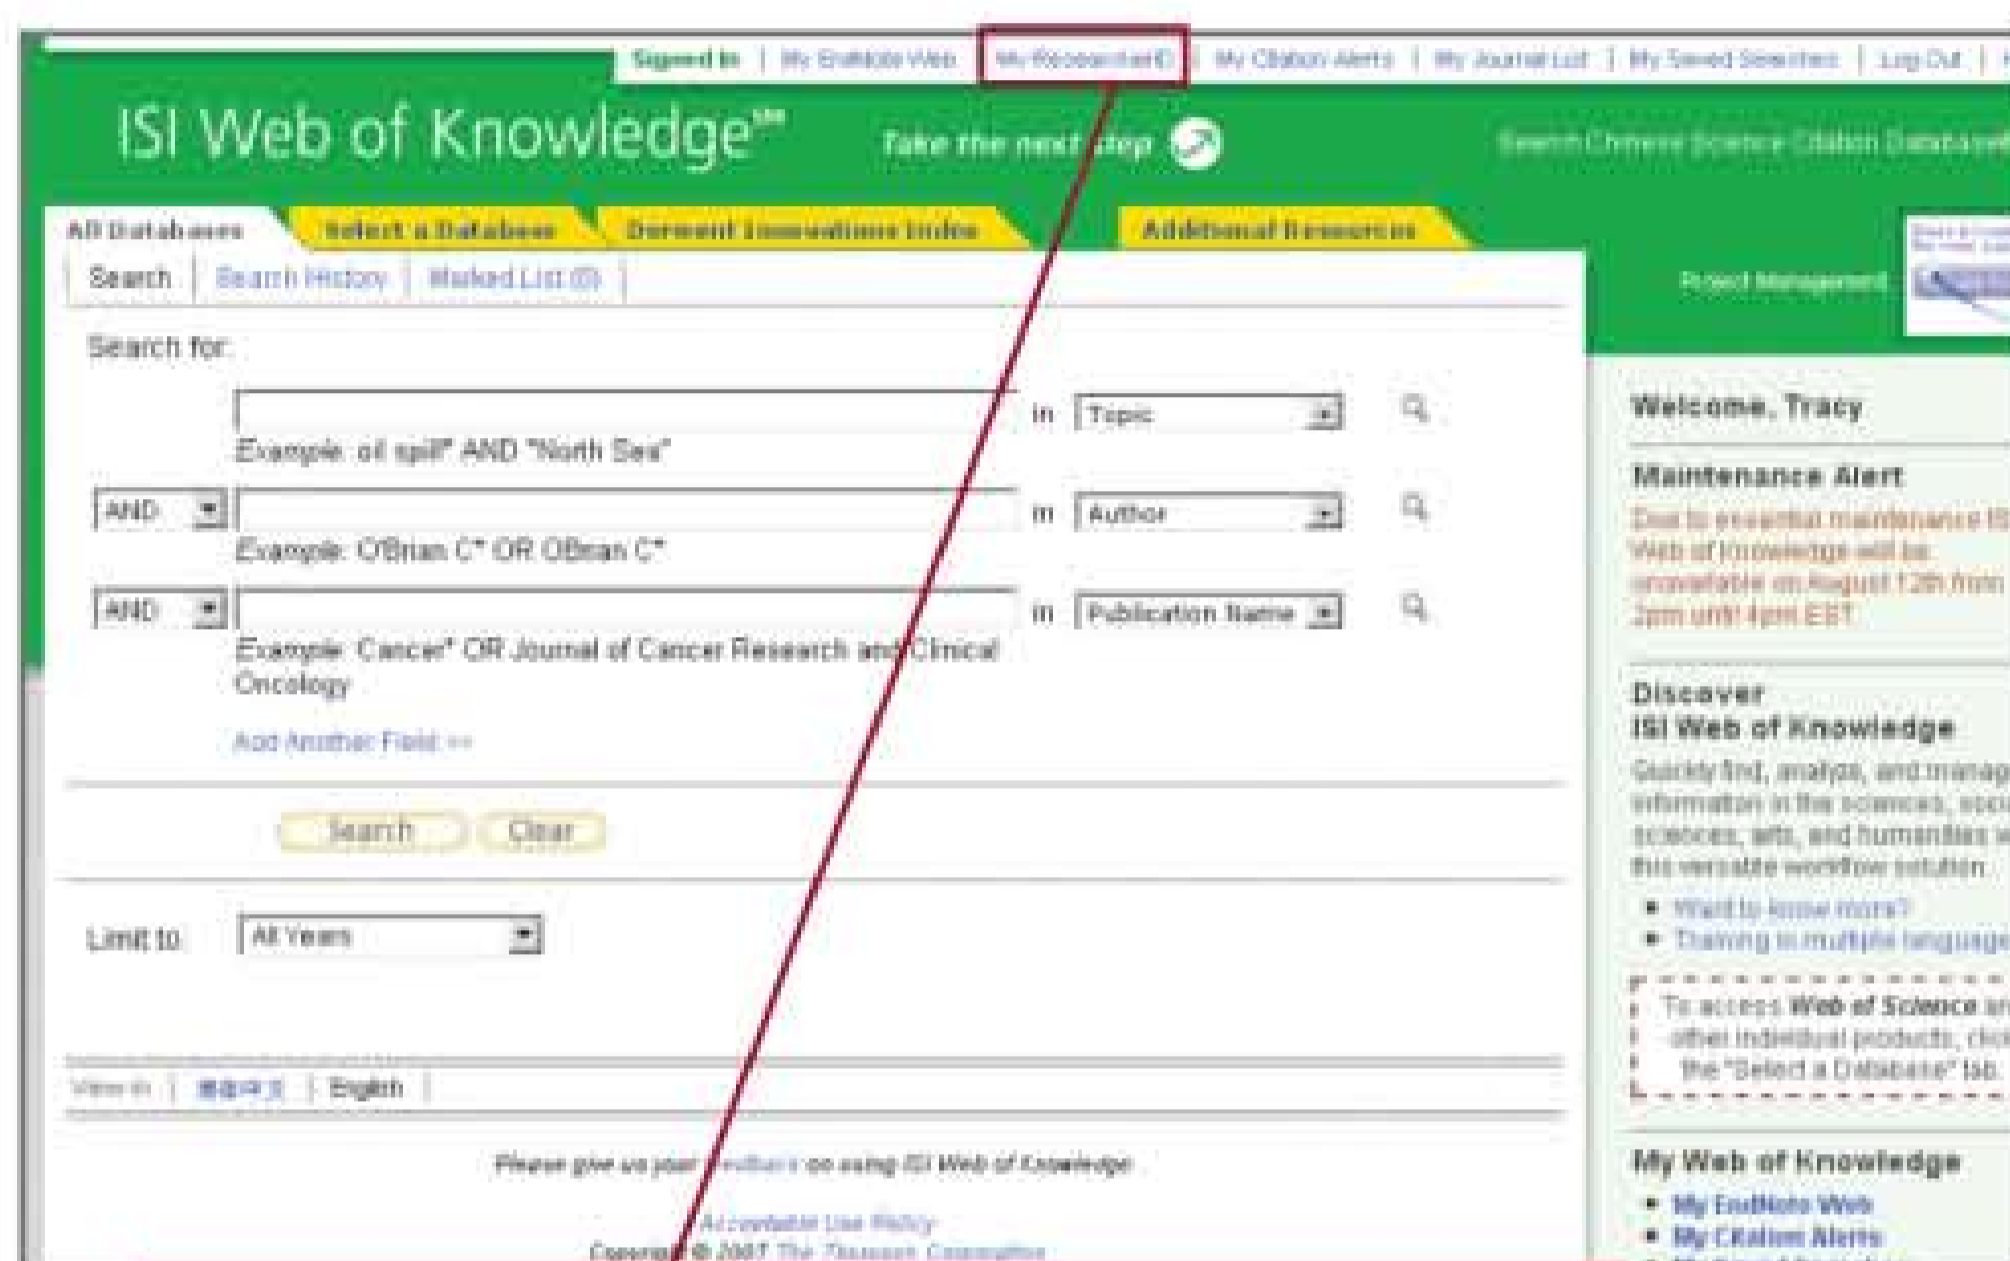

ResearcherID enables you to:

- Obtain your own URL and publish your research output.
- Automatically update citation counts.
- Create a Citation Matrix to plot graphs of your research work.
- Identify research collaborators and reviewers.

LOGGING INTO RESEARCHERID.COM

FOR ISI WEB OF KNOWLEDGESM SUBSCRIBERS

- 1 Click on **“Sign-up/Access my ResearcherID”** along the right-hand side under **“My ResearcherID”** or click **“My ResearcherID”** along the top navigation. You will be prompted to log in your *ISI Web of Knowledge* account username and password.
- 2 Some of your information will be pre-populated in the Registration form. Complete any remaining fields and click the **“Submit Registration”** button at the bottom of the page.
- 3 Accept the End User License Agreement.
- 4 Registration completed. Go to page 3 of the reference guide to build your unique profile and find researchers around the world to collaborate with.

For existing ISI Web Of Knowledge subscribers, you can access ResearcherID via isiwebofknowledge.com

FOR NON-ISI WEB OF KNOWLEDGE SUBSCRIBERS

- 1 Access **researcherid.com** and click on the **“Register”** to request for an online registration form.
- 2 Complete the form and click the **“Submit”** button. A **“Thank You”** screen will confirm receipt of your registration request.
- 3 Once you receive your confirmation email simply click on the link provided to complete your registration.

PERSONALIZE YOUR PROFILE

MANAGE YOUR RESEARCHER PROFILE

- 1 After registration, login to view your *ResearcherID* profile page.
- 2 Click on “**Manage Profile**” to add information to your profile or change your account password.

Your unique *ResearcherID* Link - you can use this link to direct others to your publication list.

- 3 Users can make their information entered “**Public**” or “**Private**”.
- 4 Preview a public version of your profile page to verify the details.

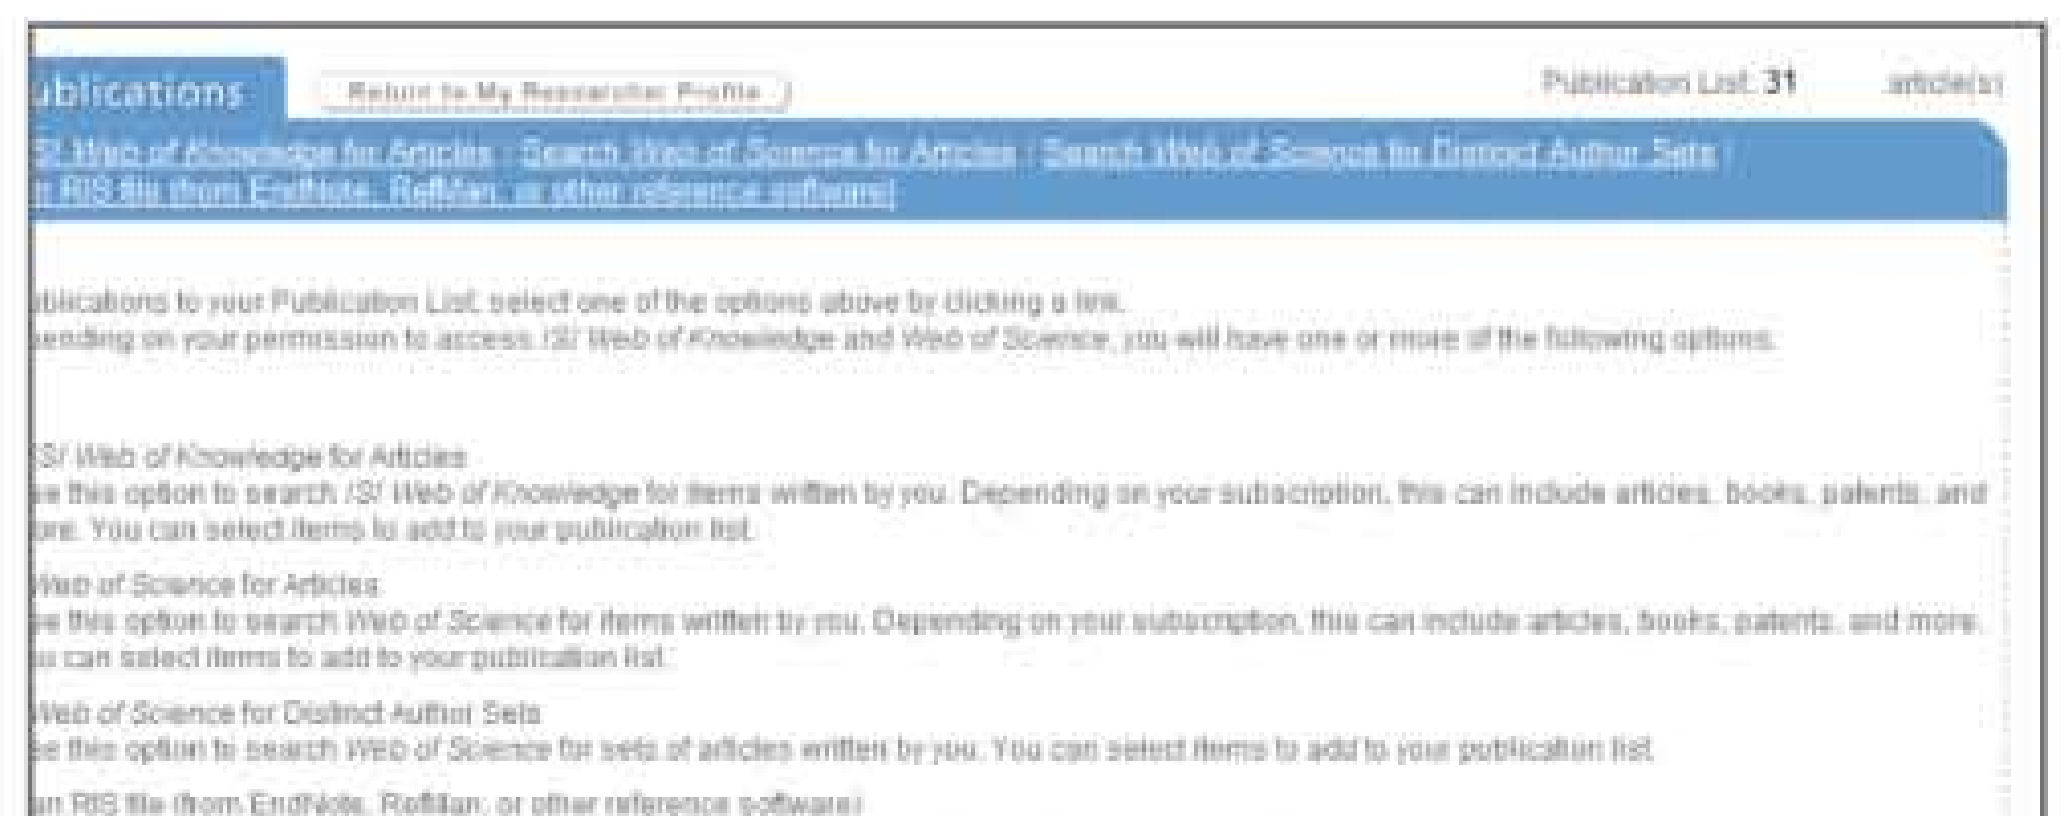

UPLOAD YOUR PUBLICATION

- 1 Click on “**Add Publication**”

- 2 There are four ways of adding publications via:
 - *ISI Web of Knowledge*
 - *Web of Science*®
 - *Web of Science Distinct Author Set*
 - *RIS file from EndNote, Reference Manager (RefMan) or other reference software*

ADD PUBLICATIONS FROM WEB OF SCIENCE

1 Click on one of the links in “**Add Publications**” to add a publication. This illustration shows the addition of publications through searching *Web of Science* for articles.

2 Enter last name and initials to search for records of relevant articles.

3 A list of records from the search will be shown.

4 Browse through all records and select the right records to your own paper by clicking on “**Add Selections to List**”.

The screenshot shows the 'Add Publications' interface. At the top, there are navigation links: 'Return to My Researcher Profile', 'Search Web of Science for Articles' (highlighted in red), and 'Search Web of Science for Distinct Author Sets'. Below this is the 'Web of Science - Article Search' section. It contains a form with the following fields: 'Last / Family Name' (with example 'Lim'), 'First Initial(s)' (with example 'JK'), 'Topic' (with example 'cancer' OR tumour), 'Source Title' (with example 'Clinical Nuclear Medicine'), and 'Publication Year' (with example '2001 or a range 1991-2001'). A 'Search' button is at the bottom right of the form. To the right of the form is a 'Search Hints (Help)' box with instructions on search syntax.

The screenshot shows the search results page. At the top, it says 'Articles: 286 record(s) returned'. Below this is a navigation bar with 'Page 1 of 20' and 'Go' buttons. A red box highlights the 'Add Selections to List' button. Below the navigation bar is a list of four articles, each with a checkbox and a 'Times Cited' count. The first article is 'Title: Knowledge Management Systems Diffusion in Chinese Enterprises: A Multistage Approach Using the Technology-Organization-Environment Framework' by Lee, C.K., Wang, M., Lim, J.K., et al. The second is 'Title: MOLECULAR AND CLINICAL CHARACTERIZATION OF HEPATOCELLULAR CARCINOMA WITH PROGENITOR CELL MARKERS' by Villanueva, A., Newell, P., Chamo, D.Y., et al. The third is 'Title: MECHANISMS OF RAS PATHWAY ACTIVATION IN HCC PATIENTS, AND COMBINATION THERAPIES BLOCKING RAS (SORAFENIB) AND MITOGEN-ACTIVATED PROTEIN KINASE (RAFAMYCIN) IN VIVO' by Newell, P., Toffanni, S., Villanueva, A., et al. The fourth is 'Title: Towards tuning of surface properties by atomic and molecular adsorption on horn-terminated cubic boron nitride (h-BN) surface: A first principles study' by No, M.F., Ted, M., Lim, J.K., et al.

ADD PUBLICATIONS FROM ENDNOTE WEB

1 Click on one of the links in “**Add Publications**” to add a publication. In this example, we choose to add publications through uploading an RIS (Research Information System) file from *EndNote*, *Reference Manager* (RefMan) or other reference software.

2 You can upload an RIS formatted text file which can be exported from *EndNote*, *RefMan* or other reference software. The RIS format is a tagged file format for expressing bibliographic citations.

This screenshot is identical to the one above, showing the 'Add Publications' interface with the 'Web of Science - Article Search' form. The 'Upload an RIS file from EndNote, RefMan, or other reference software' link is highlighted in red.

The screenshot shows the 'ResearcherID' page. At the top, there are navigation links: 'Home', 'My Researcher Profile', and 'Logout'. Below this is the 'Add Publications' section. It contains a form with the following fields: 'Upload an RIS file' (with a red box around the link), 'Browse for your RIS file' (with a 'Browse...' button), and 'Upload File' and 'Clear' buttons. At the bottom, there are links for 'Feedback Survey', 'How to Register', 'Help', 'Support', 'Privacy Policy', 'Terms of Use', and 'Logout'.

CREATE CITATION METRICS

1 Go to “My Researcher Profile” and click on the tab “Citation Metrics” in order to view :

- Total citations received for an author’s publications
- Average citations per article
- H-index

2 Look for a researcher’s profile by:

- Name
- Institution
- Keywords
- Top keywords

ResearcherID
ResearcherID.com

Home My Researcher Profile Logout Search

Search ResearcherID **Top Keywords**

Search by using one or more of the following boxes

Last / Family Name Example: Smith
First / Given Name Example: J or James
 also search "other names"

Institution Example: Cornell
 also search "past institutions"

Keywords Example: "AI/ML"

OR, enter the researcher's ResearcherID:

Search Clear

Search Tips
You can find researchers who have registered with ResearcherID.
To search for a researcher, enter their name. For a first name, by entering either just an initial or the entire first name. Check the "other names" checkbox to search the Other Names field for either the last name or first name search terms.
Use the wildcard character "*" at the end of a word to find matches with any ending (for example, "Phys*").
Or, if you know it, enter the researcher's ResearcherID.

RESEARCHERID LABS: INTERACTIVE AND COLLABORATE

- 1 Registered authors can use the *ResearcherID* Labs environment to publicize their *ResearcherID* identity and explore their collaboration and citation networks.

Link to the researcher's lab page from their profile on *ResearcherID*

Three key services

Publicize your *ResearcherID* Identity by Creating a *ResearcherID* Badge

The *ResearcherID* badge allows visitors to your web page or blog access information about members of *ResearcherID.com*. When you rollover the badge with your mouse pointer, information about the researcher is displayed in a pop-up window listing:

- Researcher's name
- *ResearcherID*
- Up to 3 of his/her most recent publications (from the researcher's *ResearcherID* publication list)
- Link to that researcher's *ResearcherID* profile page

The data presented on badge roll-over is dependent on your privacy settings (you can choose to make your publication list or entire profile private). As such, not all badge pop-ups will contain the same elements.

To Create your *ResearcherID* Badge

- 1 Select a badge type.
- 2 Generate a badge code.
- 3 Copy the code and paste it into the html of your own web page or blog.

Explore Collaboration Networks

The Collaboration Network visual displays information from the papers the researcher has written. Data is gathered by extracting data values from the *Web of Science* records in the field that you selected from the field menu (“**Authors, Categories, Countries/Territories, Institutions, Map**”). The system produces a report showing the top values in ranked order (for graphs), or the top locations on the map.

To create an analysis of the researcher’s collaboration network

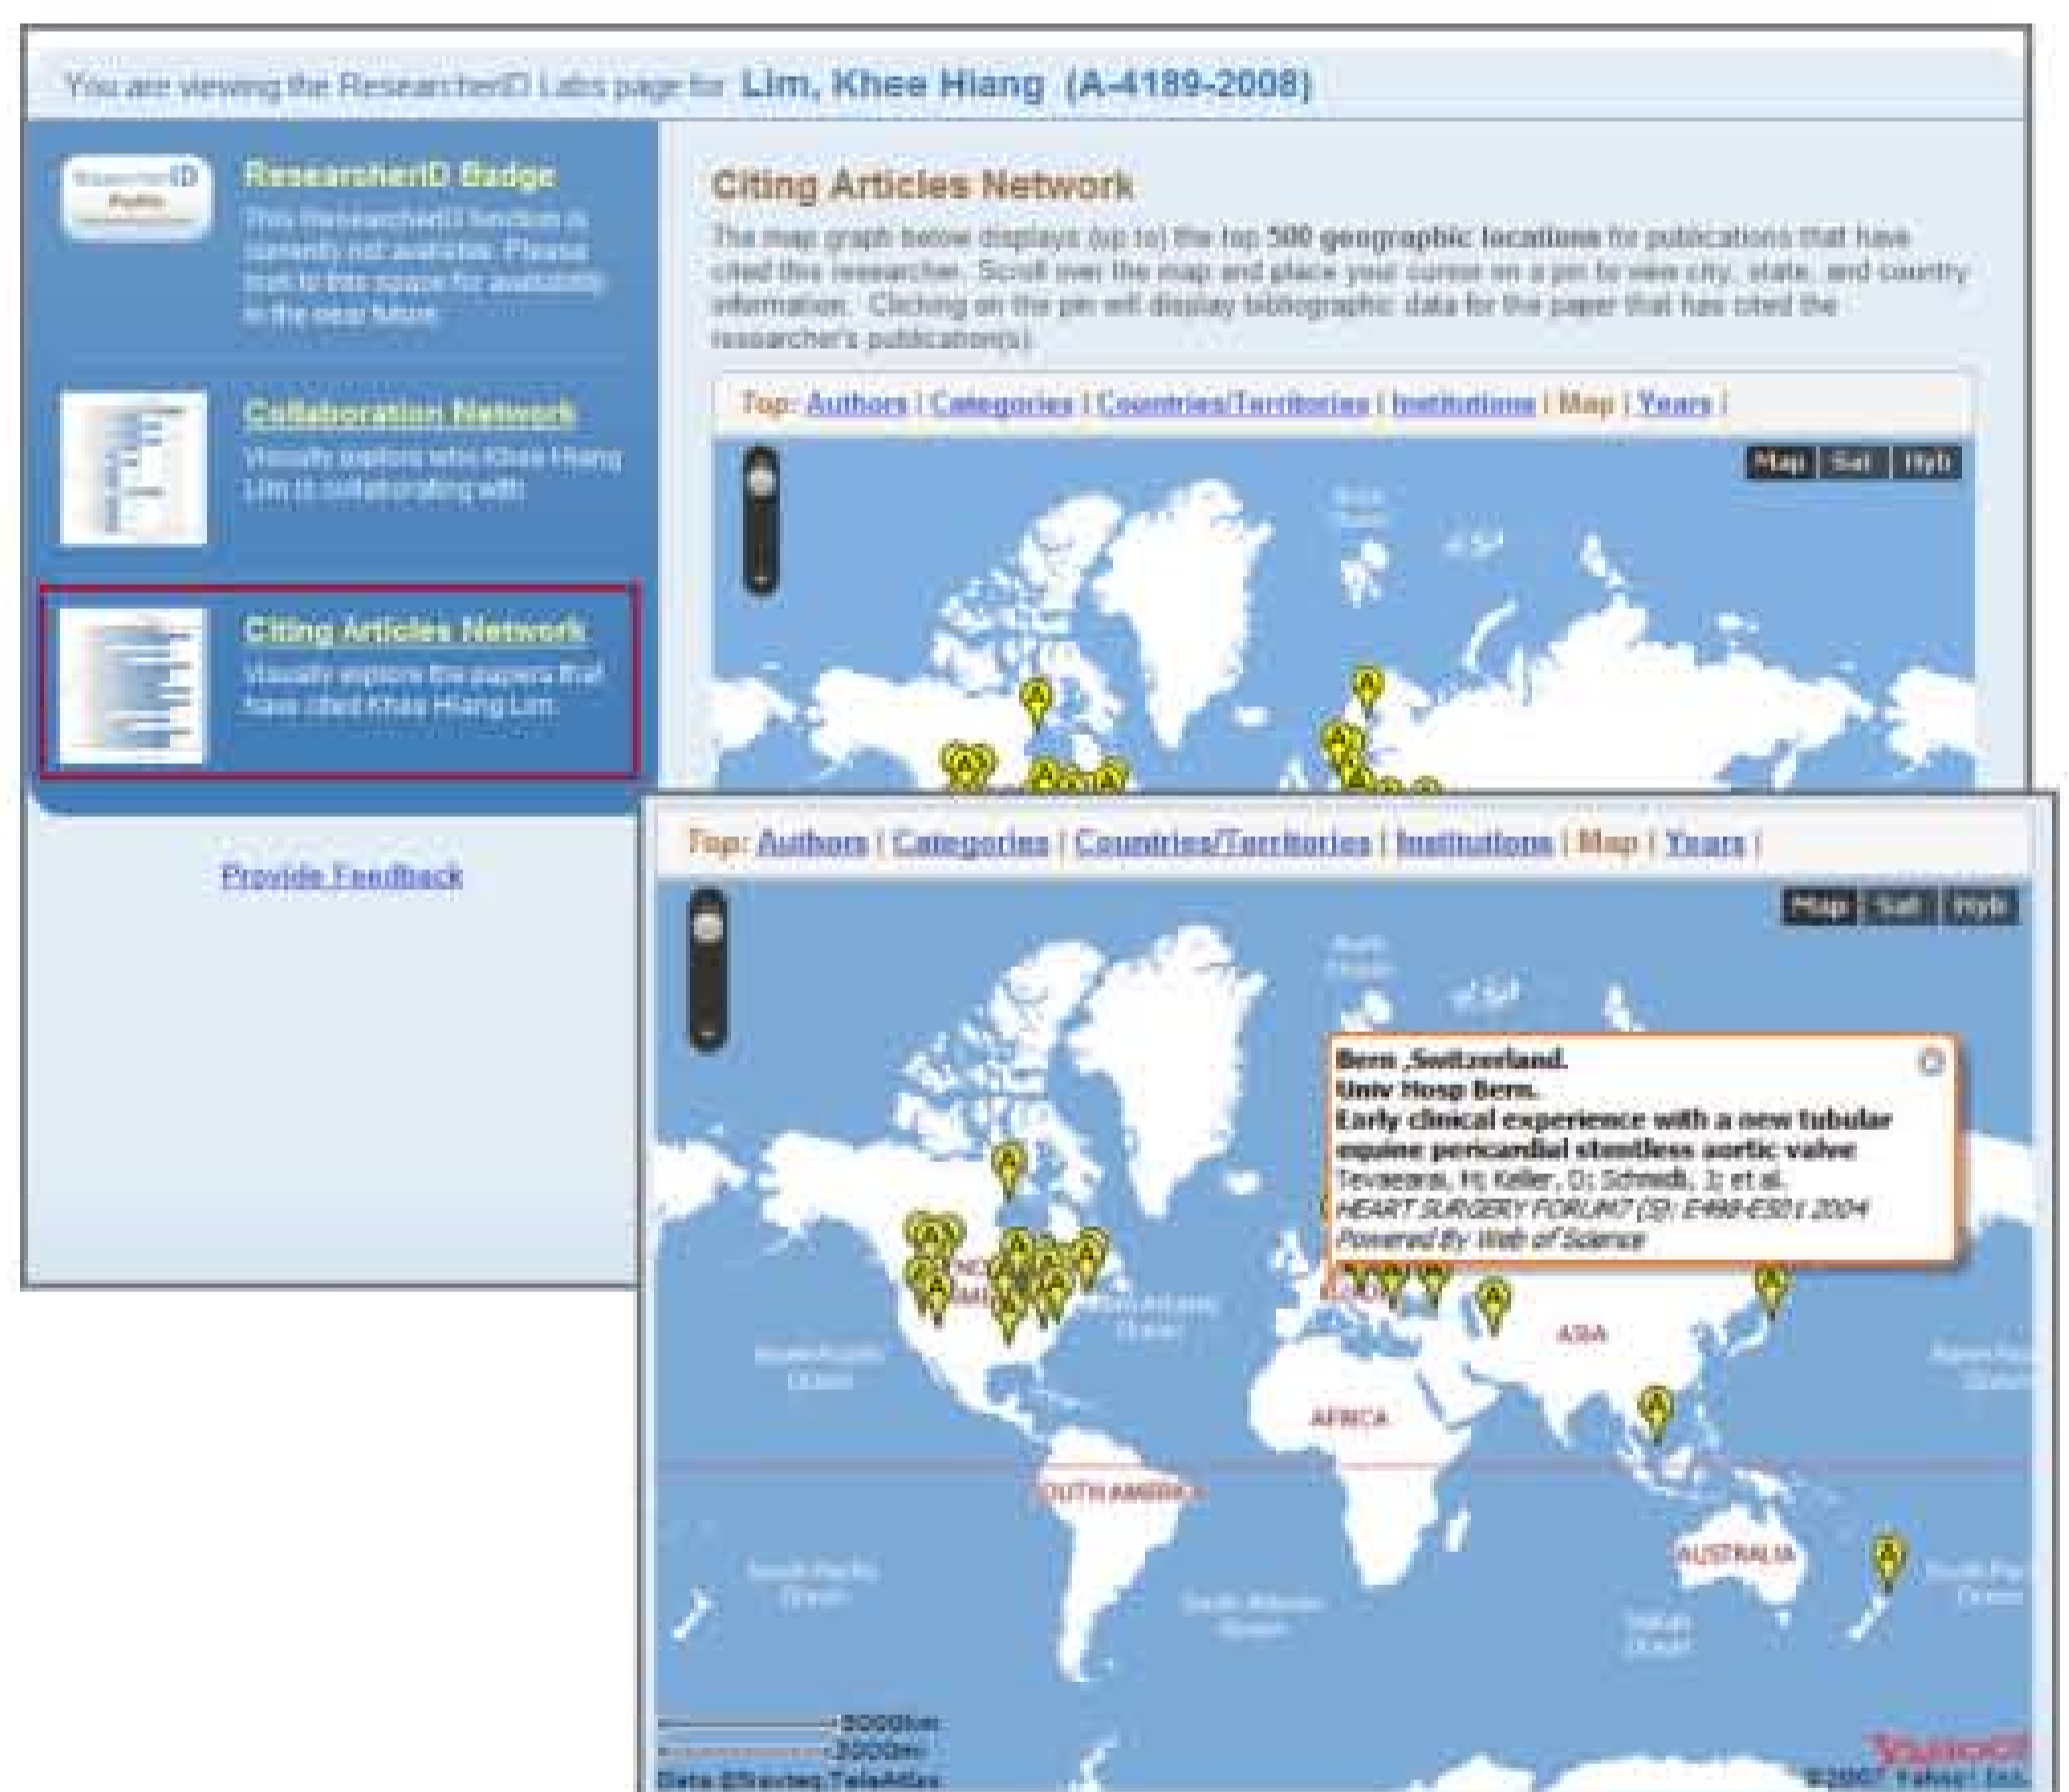

- Click on “**Collaboration Network**” found in the left column.
- View the graphs/maps based on Authors, Categories, Countries/Territories, Institutions, Map.

Explore Citation Networks

The Citing Articles Network visual displays information from the papers that cited the publications the researcher has written. Use *Web of Science*, to find the citing articles for publications on the researcher’s publication list (this is limited to publications added from *Web of Science*).

The data is gathered by extracting data values from those citing articles in the field that you selected from the field menu. The system produces a report showing the top values in ranked order (for graphs), or the top locations on the map.

To create an analysis of all forward citations received from an author’s publications

- Click on “**Citing Articles Network**” found in the left column
- View the graphs/maps based on Authors, Categories, Countries/Territories, Institutions, Map and Years.
