

B/C14-HC-Z Cancer Code Hierarchy Update

As part of the 2006 Manual Code update, Thomson Scientific has taken the opportunity to organize the current B/C14-H codes within disease-type hierarchies that will help to enhance searching of specific cancer types, and allow for inclusion of further distinct cancer codes in the future.

All document records containing previous codes *B/C14-H01C* to *B/C14-H01Z* will be updated according to the following code hierarchies, to eliminate the need for time-ranged searching. Codes *B/C14-H01M-Z* will no longer be searchable.
