

Subject/Keyword Searching

Conduct a keyword search on production methods for inks that are used in colour inkjet printers

Tip

'British' English is normally used when compiling DWPI but Derwent recommend using American spellings. Access the American/British Dictionary at <http://www.derwent.com/dwpreference/ukdict.html> if you are unsure of the terms to use.

Step 1

Enter File 351 to access Derwent's World Patents Index database.

```
? b 351
```

```
File 351:DERWENT WPI 1963-2000/UD=,UM=, & UP=200019  
(c) 2000 Derwent Info Ltd
```

Step 2

The search terms have been separated by the Near (N) operator to give the search more flexibility (for the Near to operator). The ? truncation symbol will find all the variations of the search term "PRINT".

```
? s ink(2n)jet(2n)print?
```

```
74814 INK  
85395 JET  
335523 PRINT?
```

```
S1 12907 INK (2N) JET (2N) PRINT?
```

Step 3

In this step, we have combined the results of our first set S1 with a Keyword Search on color using the "AND" operator. Notice the use of the British and American spelling for color/colour.

```
? s s1 and (color? or colour?)
```

```
25595 COLOR?  
279120 COLOUR?
```

```
S2 3063 S1 AND (COLOR? OR COLOUR?)
```

Step 4

The results of the second set S2 are combined with a Keyword Search on production. Please note the use of the Derwent abbreviation for production (prodn).

```
? s s2 and (prodn or production)

469495 PRODN
181896 PRODUCTION

S3 197 S2 AND (PRODN OR PRODUCTION)
```

Step 5

Enter the DS command to display the search history.

```
? ds

? S1 12907 INK (2N) JET (2N) PRINT?
? S2 3036 S1 AND (COLOR? OR COLOUR?)
? S3 197 S2 AND (PRODN OR PRODUCTION)
```

Step 6

Display your search results using the TYPE (T) command.

```
? t 3/26/1
