The screenshot shows the ISI Web of Knowledge search results page for the query "Topic=(stem cell* and lymphoma)". The results are sorted by "Times Cited" and show 4,835 results. The page is divided into several sections:

- 1. Refine Results:** A sidebar on the left allows users to refine results by Subject Areas (e.g., Hematology, Oncology), Document Types, Authors, Source Titles, Publication Years, Institutions, Languages, and Countries/Territories.
- 2. Sort by:** A dropdown menu at the top right allows users to sort results by Times Cited, Relevance, or Date.
- 3. Analyze Results:** A button at the top right that opens a separate window for analyzing the search results.
- 4. Action Buttons:** A row of buttons at the top of the results list, including Print, E-mail, Add to Marked List, and Save to EndNote Web.
- 5. Create Citation Report:** A button at the top right that generates a citation report for the selected results.

The main results list displays five entries, each with a title, author(s), source, volume, issue, pages, publication date, and times cited. For example, the first entry is "BCL2 PROTEIN IS TOPOGRAPHICALLY RESTRICTED IN TISSUES CHARACTERIZED BY APOPTOTIC CELL-DEATH" by Hockenbery et al., published in the Proceedings of the National Academy of Sciences of the United States of America.
